1. Claims 1-29 are presented.
2. Claims 1-29 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a) Claims 1-18, 26 and 28 are vague and indefinite because independent claims 1, 26 and 28 recite the phrase "...based, at least in part, on said social index". Examiner cannot ascertain clearly what other parts play a role in selecting the information segments other than the social index;
 - b) claims 1 and 19 recite the phrase "providing a notification ... " It is not clear how and to whom the notification is provided;
 - c) claim 1 recites "providing a notification of said one of said plurality of information segments" but prior to this step, there is a selection step which also states selecting one of said plurality of information segments. Therefore, it is not clear whether the selected one of the one of information segments is provided at the following step or another one of the one of the information segments are provided. Applicant should fix this and similar languages throughout the all of the claims by following through the language of a previous step with the following step so that a continuity in taught process is clearly established. It is noted that usage of the phrase "one of said plurality" is causing the problem of vagueness and indefiniteness; and

d) elements of claim 27 are not properly interlinked and interrelated to each other. For example, it is not clear how the processor is going to operate to determine a social index because the memory does not store any code or instructions to provide this functionality to the processor.
